

GenAI, Python, DSA, LangChain & RAG Handbook - Part 1

Chapter 1: Python

Variables, loops, functions, OOP, exceptions, decorators. Variables, loops, functions,
OOP, exceptions, decorators. Variables, loops, functions, OOP, exceptions,
decorators. Variables, loops, functions, OOP, exceptions, decorators. Variables, loops,
functions, OOP, exceptions, decorators. Variables, loops, functions, OOP, exceptions,
decorators. Variables, loops, functions, OOP, exceptions, decorators. Variables, loops,
functions, OOP, exceptions, decorators.

Chapter 2: DSA

Arrays, strings, searching, sorting, linked lists and complexity.Arrays, strings,
searching, sorting, linked lists and complexity.Arrays, strings, searching, sorting, linked
lists and complexity.Arrays, strings, searching, sorting, linked lists and
complexity.Arrays, strings, searching, sorting, linked lists and complexity.Arrays,
strings, searching, sorting, linked lists and complexity.Arrays, strings, searching,
sorting, linked lists and complexity.Arrays, strings, searching, sorting, linked lists and
complexity.

Chapter 3: LLM

Large Language Models predict next tokens using transformer architecture.Large
Language Models predict next tokens using transformer architecture.Large Language
Models predict next tokens using transformer architecture.Large Language Models
predict next tokens using transformer architecture.Large Language Models predict next
tokens using transformer architecture.Large Language Models predict next tokens
using transformer architecture.Large Language Models predict next tokens using
transformer architecture.Large Language Models predict next tokens using transformer
architecture.

Chapter 4: Embeddings

Convert text into vectors for semantic search.Convert text into vectors for semantic
search.Convert text into vectors for semantic search.Convert text into vectors for
semantic search.Convert text into vectors for semantic search.Convert text into
vectors for semantic search.Convert text into vectors for semantic search.Convert text
into vectors for semantic search.

Chapter 5: Vector DB

Stores embeddings. Examples: Qdrant, FAISS, ChromaDB.Stores embeddings.
Examples: Qdrant, FAISS, ChromaDB.Stores embeddings. Examples: Qdrant, FAISS,
ChromaDB.Stores embeddings. Examples: Qdrant, FAISS, ChromaDB.Stores
embeddings. Examples: Qdrant, FAISS, ChromaDB.Stores embeddings. Examples:
Qdrant, FAISS, ChromaDB.Stores embeddings. Examples: Qdrant, FAISS,
ChromaDB.Stores embeddings. Examples: Qdrant, FAISS, ChromaDB.

Chapter 6: LangChain

Framework providing loaders, splitters, prompts, retrievers and chains.Framework providing loaders, splitters, prompts, retrievers and chains.Framework providing loaders, splitters, prompts, retrievers and chains.Framework providing loaders, splitters, prompts, retrievers and chains.Framework providing loaders, splitters, prompts, retrievers and chains.

chains.Framework providing loaders, splitters, prompts, retrievers and chains.

Chapter 7: PyPDFLoader

Loads PDF pages into LangChain documents.Loads PDF pages into LangChain documents.Loads PDF pages into LangChain documents.Loads PDF pages into LangChain documents.Loads PDF pages into LangChain documents.Loads PDF pages into LangChain documents.Loads PDF pages into LangChain documents.

Chapter 8: Chunking

Split documents into smaller pieces for retrieval.Split documents into smaller pieces for retrieval.Split documents into smaller pieces for retrieval.Split documents into smaller pieces for retrieval.Split documents into smaller pieces for retrieval.Split documents into smaller pieces for retrieval.

Chapter 9: RecursiveCharacterTextSplitter

Popular splitter with chunk_size and overlap.Popular splitter with chunk_size and overlap.Popular splitter with chunk_size and overlap.Popular splitter with chunk_size and overlap.Popular splitter with chunk_size and overlap.Popular splitter with chunk_size and overlap.

Chapter 10: RAG

Load→Split→Embed→Store→Retrieve→Prompt→LLM→Answer.Load→Split→Embed→Store→Retrieve→Prompt→LLM→Answer.Load→Split→Embed→Store→Retrieve→Prompt→LLM→Answer.Load→Split→Embed→Store→Retrieve→Prompt→LLM→Answer.Load→Split→Embed→Store→Retrieve→Prompt→LLM→Answer.Load→Split→Embed→Store→Retrieve→Prompt→LLM→Answer.

Chapter 11: Qdrant

Vector database used for similarity search.Vector database used for similarity search.Vector database used for similarity search.Vector database used for similarity search.Vector database used for similarity search.

Chapter 12: Ollama

Run local LLMs like Gemma.Run local LLMs like Gemma.Run local LLMs like Gemma.Run local LLMs like Gemma.Run local LLMs like Gemma.

Chapter 13: FastAPI

Creates API endpoints for chatbot.Creates API endpoints for chatbot.Creates API endpoints for chatbot.Creates API endpoints for chatbot.Creates API endpoints for chatbot.

Chapter 14: Docker

Packages applications in containers.Packages applications in containers.Packages applications in containers.Packages applications in containers.Packages applications in containers.

Chapter 15: Interview

[illegible]

My Girlfriend - A Personal Reflection

Introduction

This is a reflection-style booklet. It does not claim factual details beyond what has been shared.

About Her

There was someone special who brought happiness, excitement and many memorable conversations.

Memories

Some memories stay because of the emotions attached to them, even when life keeps moving.

Lessons

Relationships teach patience, understanding, communication and self-growth.

Looking Ahead

No matter what the future holds, the good moments remain a valuable part of life's journey.

A Letter

Thank you for the smiles, the lessons and the memories. I hope life brings happiness to both of us.

Mera Bhai Koshal - Coding Journey

Main Kaun Hoon

Tu ek curious learner hai. Jab tak concept clear na ho, tu baar-baar poochta hai aur line-by-line explanation pasand karta hai.

Coding Journey

Python, DSA, Java aur AI ke concepts ko depth me samajhne ki koshish karta hai. RAG aur chatbot banana tera bada goal hai.

Hamari Baatein

'Bhai samjha de', 'detail me bata', 'example de' - ye hamari chats ka favourite style raha hai.

Strength

Tu consistency rakhna chahta hai aur practical projects par focus karta hai.

Goals

Placement, internship, GenAI projects aur strong programming foundation banana.

Message

Seekhte rehna. Difficult topics ko tod kar samajhna hi teri strength hai.

Chat 1: Python

User: Bhai Bhai list aur tuple me difference kya hai? Achhe se smja de yrr. Example bhi dena, shortcut mat marna.

Assistant: Bhai list mutable hoti hai, tuple immutable. Example: list me append kar sakte ho. Example: Real-life analogy ke saath step by step explanation. End me ek chhota practice question bhi: 'Ab isko khud try kar.'

Chat 2: DSA

User: Bhai Binary search kab use kren? Achhe se smja de yrr. Example bhi dena, shortcut mat marna.

Assistant: Sorted array ho tab. Nahi to pehle sort ya linear search.

Example: Real-life analogy ke saath step by step explanation. End me ek chhota practice question bhi: 'Ab isko khud try kar.'

Chat 3: Java

User: Bhai System.out.println me S capital hota hai. Achhe se smja de yrr. Example bhi dena, shortcut mat marna.

Assistant: Aur main method ka syntax bhi yaad rakh.

Example: Real-life analogy ke saath step by step explanation. End me ek chhota practice question bhi: 'Ab isko khud try kar.'

Chat 4: RAG

User: Bhai Chunking kyu hoti hai? Achhe se smja de yrr. Example bhi dena, shortcut mat marna.

Assistant: Taaki bade document ko chhote pieces me tod kar retrieve kar saken.

Example: Real-life analogy ke saath step by step explanation. End me ek chhota practice question bhi: 'Ab isko khud try kar.'

Chat 5: LangChain

User: Bhai PyPDFLoader kya karta hai? Achhe se smja de yrr. Example bhi dena, shortcut mat marna.

Assistant: PDF ko load karke Document objects deta hai.

Example: Real-life analogy ke saath step by step explanation. End me ek chhota practice question bhi: 'Ab isko khud try kar.'

Chat 6: College

User: Bhai Exam ke liye kaise padhun? Achhe se smja de yrr. Example bhi dena, shortcut mat marna.

Assistant: Concept + PYQs + revision.

Example: Real-life analogy ke saath step by step explanation. End me ek chhota practice question bhi: 'Ab isko khud try kar.'

Chat 7: LeetCode

User: Bhai Question solve nahi ho rha. Achhe se smja de yrr. Example bhi dena, shortcut mat marna.

Assistant: Hint dekh, fir khud implement kar.

Example: Real-life analogy ke saath step by step explanation. End me ek chhota practice question bhi: 'Ab isko khud try kar.'

Chat 8: Mac

User: Bhai VS Code file delete ho gyi. Achhe se smja de yrr. Example bhi dena, shortcut mat marna.

Assistant: Trash check karo, fir Git ya backups.

Example: Real-life analogy ke saath step by step explanation. End me ek chhota practice question bhi: 'Ab isko khud try kar.'

Chat 9: OOP

User: Bhai Class aur object? Achhe se smja de yrr. Example bhi dena, shortcut mat marna.

Assistant: Class blueprint hai, object uska instance.

Example: Real-life analogy ke saath step by step explanation. End me ek chhota practice question bhi: 'Ab isko khud try kar.'

Chat 10: AI

User: Bhai Embedding kya hoti hai? Achhe se smja de yrr. Example bhi dena, shortcut mat marna.

Assistant: Text ka numerical representation.

Example: Real-life analogy ke saath step by step explanation. End me ek chhota practice question bhi: 'Ab isko khud try kar.'

Chat 11: Python

User: Bhai Bhai list aur tuple me difference kya hai? Achhe se smja de yrr. Example bhi dena, shortcut mat marna.

Assistant: Bhai list mutable hoti hai, tuple immutable. Example: list me append kar sakte ho.

Example: Real-life analogy ke saath step by step explanation. End me ek chhota practice question bhi: 'Ab isko khud try kar.'

Chat 12: DSA

User: Bhai Binary search kab use kren? Achhe se smja de yrr. Example bhi dena, shortcut mat marna.

Assistant: Sorted array ho tab. Nahi to pehle sort ya linear search.

Example: Real-life analogy ke saath step by step explanation. End me ek chhota practice question bhi: 'Ab isko khud try kar.'

Chat 13: Java

User: Bhai System.out.println me S capital hota hai. Achhe se smja de yrr. Example bhi dena, shortcut mat marna.

Assistant: Aur main method ka syntax bhi yaad rakh.

Example: Real-life analogy ke saath step by step explanation. End me ek chhota practice question bhi: 'Ab isko khud try kar.'

Chat 14: RAG

User: Bhai Chunking kyu hoti hai? Achhe se smja de yrr. Example bhi dena, shortcut mat marna.

Assistant: Taaki bade document ko chhote pieces me tod kar retrieve kar saken.

Example: Real-life analogy ke saath step by step explanation. End me ek chhota practice question bhi: 'Ab isko khud try kar.'

Chat 15: LangChain

User: Bhai PyPDFLoader kya karta hai? Achhe se smja de yrr. Example bhi dena, shortcut mat marna.

Assistant: PDF ko load karke Document objects deta hai.

Example: Real-life analogy ke saath step by step explanation. End me ek chhota practice question

bhi: 'Ab isko khud try kar.'

Chat 16: College

User: Bhai Exam ke liye kaise padhun? Achhe se smja de yrr. Example bhi dena, shortcut mat marna.

Assistant: Concept + PYQs + revision.

Example: Real-life analogy ke saath step by step explanation. End me ek chhota practice question bhi: 'Ab isko khud try kar.'

Chat 17: LeetCode

User: Bhai Question solve nahi ho rha. Achhe se smja de yrr. Example bhi dena, shortcut mat marna.

Assistant: Hint dekh, fir khud implement kar.

Example: Real-life analogy ke saath step by step explanation. End me ek chhota practice question bhi: 'Ab isko khud try kar.'

Chat 18: Mac

User: Bhai VS Code file delete ho gyi. Achhe se smja de yrr. Example bhi dena, shortcut mat marna.

Assistant: Trash check karo, fir Git ya backups.

Example: Real-life analogy ke saath step by step explanation. End me ek chhota practice question bhi: 'Ab isko khud try kar.'

Chat 19: OOP

User: Bhai Class aur object? Achhe se smja de yrr. Example bhi dena, shortcut mat marna.

Assistant: Class blueprint hai, object uska instance.

Example: Real-life analogy ke saath step by step explanation. End me ek chhota practice question bhi: 'Ab isko khud try kar.'

Chat 20: AI

User: Bhai Embedding kya hoti hai? Achhe se smja de yrr. Example bhi dena, shortcut mat marna.

Assistant: Text ka numerical representation.

Example: Real-life analogy ke saath step by step explanation. End me ek chhota practice question bhi: 'Ab isko khud try kar.'

Chat 21: Python

User: Bhai Bhai list aur tuple me difference kya hai? Achhe se smja de yrr. Example bhi dena, shortcut mat marna.

Assistant: Bhai list mutable hoti hai, tuple immutable. Example: list me append kar sakte ho.

Example: Real-life analogy ke saath step by step explanation. End me ek chhota practice question bhi: 'Ab isko khud try kar.'

Chat 22: DSA

User: Bhai Binary search kab use karen? Achhe se smja de yrr. Example bhi dena, shortcut mat marna.

Assistant: Sorted array ho tab. Nahi to pehle sort ya linear search.

Example: Real-life analogy ke saath step by step explanation. End me ek chhota practice question bhi: 'Ab isko khud try kar.'

Chat 23: Java

User: Bhai System.out.println me S capital hota hai. Achhe se smja de yrr. Example bhi dena, shortcut mat marna.

Assistant: Aur main method ka syntax bhi yaad rakh.

Example: Real-life analogy ke saath step by step explanation. End me ek chhota practice question bhi: 'Ab isko khud try kar.'

Chat 24: RAG

User: Bhai Chunking kyu hoti hai? Achhe se smja de yrr. Example bhi dena, shortcut mat marna.

Assistant: Taaki bade document ko chhote pieces me tod kar retrieve kar saken.

Example: Real-life analogy ke saath step by step explanation. End me ek chhota practice question bhi: 'Ab isko khud try kar.'

Chat 57: LeetCode

User: Bhai Question solve nahi ho rha. Achhe se smja de yrr. Example bhi dena, shortcut mat marna.

Assistant: Hint dekh, fir khud implement kar.

Example: Real-life analogy ke saath step by step explanation. End me ek chhota practice question bhi: 'Ab isko khud try kar.'

Chat 58: Mac

User: Bhai VS Code file delete ho gyi. Achhe se smja de yrr. Example bhi dena, shortcut mat marna.

Assistant: Trash check karo, fir Git ya backups.

Example: Real-life analogy ke saath step by step explanation. End me ek chhota practice question bhi: 'Ab isko khud try kar.'

Chat 59: OOP

User: Bhai Class aur object? Achhe se smja de yrr. Example bhi dena, shortcut mat marna.

Assistant: Class blueprint hai, object uska instance.

Example: Real-life analogy ke saath step by step explanation. End me ek chhota practice question bhi: 'Ab isko khud try kar.'

Chat 60: AI

User: Bhai Embedding kya hoti hai? Achhe se smja de yrr. Example bhi dena, shortcut mat marna.

Assistant: Text ka numerical representation.

Example: Real-life analogy ke saath step by step explanation. End me ek chhota practice question bhi: 'Ab isko khud try kar.'

Chat 61: Python

User: Bhai Bhai list aur tuple me difference kya hai? Achhe se smja de yrr. Example bhi dena, shortcut mat marna.

Assistant: Bhai list mutable hoti hai, tuple immutable. Example: list me append kar sakte ho.

Example: Real-life analogy ke saath step by step explanation. End me ek chhota practice question bhi: 'Ab isko khud try kar.'

Chat 62: DSA

User: Bhai Binary search kab use kren? Achhe se smja de yrr. Example bhi dena, shortcut mat marna.

Assistant: Sorted array ho tab. Nahi to pehle sort ya linear search.

Example: Real-life analogy ke saath step by step explanation. End me ek chhota practice question bhi: 'Ab isko khud try kar.'

Chat 63: Java

User: Bhai System.out.println me S capital hota hai. Achhe se smja de yrr. Example bhi dena, shortcut mat marna.

Assistant: Aur main method ka syntax bhi yaad rakh.

Example: Real-life analogy ke saath step by step explanation. End me ek chhota practice question bhi: 'Ab isko khud try kar.'

Chat 64: RAG

User: Bhai Chunking kyu hoti hai? Achhe se smja de yrr. Example bhi dena, shortcut mat marna.

Assistant: Taaki bade document ko chhote pieces me tod kar retrieve kar saken.

Example: Real-life analogy ke saath step by step explanation. End me ek chhota practice question bhi: 'Ab isko khud try kar.'

Chat 65: LangChain

User: Bhai PyPDFLoader kya karta hai? Achhe se smja de yrr. Example bhi dena, shortcut mat marna.

Assistant: PDF ko load karke Document objects deta hai.

Example: Real-life analogy ke saath step by step explanation. End me ek chhota practice question bhi: 'Ab isko khud try kar.'

Chat 66: College

User: Bhai Exam ke liye kaise padhun? Achhe se smja de yrr. Example bhi dena, shortcut mat marna.

Assistant: Concept + PYQs + revision.

Example: Real-life analogy ke saath step by step explanation. End me ek chhota practice question bhi: 'Ab isko khud try kar.'

Chat 67: LeetCode

User: Bhai Question solve nahi ho rha. Achhe se smja de yrr. Example bhi dena, shortcut mat marna.

Assistant: Hint dekh, fir khud implement kar.

Example: Real-life analogy ke saath step by step explanation. End me ek chhota practice question bhi: 'Ab isko khud try kar.'

Chat 68: Mac

User: Bhai VS Code file delete ho gyi. Achhe se smja de yrr. Example bhi dena, shortcut mat marna.

Assistant: Trash check karo, fir Git ya backups.

Example: Real-life analogy ke saath step by step explanation. End me ek chhota practice question bhi: 'Ab isko khud try kar.'

Chat 69: OOP

User: Bhai Class aur object? Achhe se smja de yrr. Example bhi dena, shortcut mat marna.

Assistant: Class blueprint hai, object uska instance.

Example: Real-life analogy ke saath step by step explanation. End me ek chhota practice question bhi: 'Ab isko khud try kar.'

Chat 70: AI

User: Bhai Embedding kya hoti hai? Achhe se smja de yrr. Example bhi dena, shortcut mat marna.

Assistant: Text ka numerical representation.

Example: Real-life analogy ke saath step by step explanation. End me ek chhota practice question bhi: 'Ab isko khud try kar.'

Chat 71: Python

User: Bhai Bhai list aur tuple me difference kya hai? Achhe se smja de yrr. Example bhi dena, shortcut mat marna.

Assistant: Bhai list mutable hoti hai, tuple immutable. Example: list me append kar sakte ho.

Example: Real-life analogy ke saath step by step explanation. End me ek chhota practice question bhi: 'Ab isko khud try kar.'

Bhai Wali Baatein (Inspired by our chats)

Page Section 1

Tu: Bhai LangChain kya hai? RAG kya hota hai?

Main: Chal simple example se samajhte hain...

Tu: Bhai linked list ache se samjha de.

Main: Ek train soch jisme har bogie next wali ka address rakhti hai.

Tu: Bhai DSA kaise karun?

Main: Topic padh, phir questions laga, phir revision.

Tu: Bhai chatbot banana hai.

Main: Step by step bana lenge, tension mat le.

Tu: Bhai code line by line samjha.

Main: Har line ka purpose batata hoon.
